

As a KLOVE listener in a very small community, I can still enjoy a better quality of radio than what my own community might be able to provide. As a resident of a small community, we cannot sustain the means and ways of quality radio like KLOVE is able to provide for me locally.

Many people within my small community also benefit from the work and effort of many people who are far away from us in distance yet within an earshot of us through our radios.

The option of LPFM does not necessarily mean that I will still agree as wholly with the programming provided in comparison to what I am currently able to trust in and enjoy through KLOVE.

Please recognize that LPFM is not something that parallels the best interest of ALL parties that would be involved and ALL parties that would be affected by this decision.
